*Preamble*

The Contracting States of this Protocol,

*Having regard* to the Agreement on the Creation of the African Regional Intellectual Property Organization (ARIPO) then known as the Industrial Property Organization for English-Speaking Africa, concluded in Lusaka (Zambia) on December 9, 1976, and in particular to its Article III(c), in accordance with which the objectives of the Organization include the establishment of such common services or organs as may be necessary or desirable for the co-ordination, harmonization and development of the intellectual property activities affecting its members,

*Having regard* to Article 19 of the Paris Convention for the Protection of Industrial Property signed in Paris on March 20, 1883, and revised on July 14, 1967, and a Regional Treaty within the meaning of Article 45, Paragraph 1, of the Patent Cooperation Treaty of June, 1970,

*Desiring* to strengthen co-operation between the States in respect of protection and exploitation of patents, utility models and industrial designs and to provide quality intellectual property services for the social, economic and technological development of Member States,

*Desiring* that such protection may be obtained in those States by a single procedure for the grant of patents, registration of utility models and of industrial designs and by the establishment of certain standard rules governing patents so granted and utility models and industrial designs so registered,

*Considering* the advantages to be gained by the pooling of resources in respect of intellectual property administration,

Hereby agree as follows:

***Section 1***  
***General***

(1) The African Regional Intellectual Property Organization (ARIPO) is empowered to grant patents and to register utility models and industrial designs and to administer such patents, utility models and industrial designs on behalf of Contracting States in accordance with the provisions of the Protocol, through its Secretariat (hereinafter referred to as “the Office”).

(2) Patents granted or utility models and industrial designs registered by virtue of this Protocol shall respectively be called ARIPO patents, ARIPO utility models and ARIPO industrial designs.

(3) The ARIPO patent or ARIPO utility model or ARIPO industrial design shall in each of the Contracting States for which it is granted or registered, as the case may be, have the effect of, and be subject to the same conditions as, a national patent granted, or utility model and industrial design registered, by that State.

*Section Ibis*  
*Application to Contain one or More Designations of Contracting States*

The grant of an ARIPO patent or the registration of an ARIPO utility model or an ARIPO industrial design may be requested for one or more of the Contracting States.

*Section 2*  
*Filing and Transmittal of Applications*

(1) Applications for the grant of patents or the registration of utility models and industrial designs by the Office shall be filed by the authorized representative of the applicant or by the applicant with either the Office or, where the law of a Contracting State so permits, the industrial property office of a Contracting State.

(2) An application filed with the industrial property office of a Contracting State under the provisions of paragraph (1) of this Section shall have the same effect as if it had been filed on the same date at the Office.

(3) The provisions of paragraphs (1) and (2) of this Section shall not preclude the application of legislative provisions which, in any Contracting State—

(a) govern inventions which, owing to the nature of their subject-matter, may not be communicated abroad without the prior authorization of the competent authority of that State, or

(b) prescribe that each application is to be filed initially with the industrial property office of the Contracting State or make direct filing with another authority subject to prior authorization.

(4) An applicant may be represented by an attorney, agent or legal practitioner who has the right to represent applicants before the industrial property office of any Contracting State. Where—

(a) an application is filed directly with the Office but the applicant's ordinary residence or principal place of business is not situated in the host country of the Office; or

(b) an application is filed with the industrial property office of a Contracting State by an applicant whose ordinary residence or principal place of business is not situated in a Contracting State, the applicant shall be represented.

(5) Where the application is filed with the industrial property office of a Contracting State, such office shall within one month of receiving the application, transmit that application to the Office.

(6) Applications for an ARIPO patent, or for registration of an ARIPO utility model or an ARIPO industrial design, may be lodged in any language which must be translated into English within two months from the date of filing in accordance with Rule 5(2).

(7) Any person, or his successor in title, who has duly applied—

(a) to any state party to the Paris Convention for the Protection of Industrial Property, or

(b) to any member of the World Trade Organization,

for a patent, or for registration of a utility model or of an industrial design, shall enjoy for the purposes of filing for an ARIPO patent, or for registration of a utility model or of an industrial design, in respect

of the same invention or design a right of priority during a period of 12 months (patents and utility models) and 6 months (industrial designs), from the date of filing the first application.

(8) Right of priority:

(a) Every filing that is equivalent to a regular national filing under the national law of the State where it was due, under bilateral or multilateral agreement including this Protocol, shall be recognized as giving rise to a right of priority.

(b) An applicant desiring to take advantage of the priority of the previous application shall file a declaration of priority and any other document required in accordance with the Implementing Regulations.

(c) Multiple priorities may be claimed in respect of an ARIPO patent application or an ARIPO utility model application or an ARIPO industrial design application, notwithstanding that they originated in different countries. Where appropriate, multiple priorities may be claimed for one claim. Where multiple priorities are claimed, time limits which run from the date of priority shall run from the earliest date of priority.

### *Section 2bis* *ARIPO Patent Applications*

(1) An ARIPO patent application:

(a) Shall relate to one invention only or to a group of inventions so linked that they form a single general inventive concept.

(b) Shall disclose the invention in a manner sufficiently clear and complete for it to be carried out by a person skilled in the art.

(2) The claims shall define the matter for which protection is sought. They shall be clear and concise and shall be supported by the description.

(3) The abstract shall merely serve for use as a source of technical information; in particular not for the purposes of interpreting the scope of the protection sought.

### *Section 3* *Patents*

(1)(a) An ARIPO patent application shall—

- (i) identify the applicant;
- (ii) contain, as prescribed, a description of the invention, a claim or claims, a drawing or drawings (where necessary), sequence listing (where necessary) and an abstract;
- (iii) designate the Contracting States for which a patent is requested to be granted;
- (iv) be subject to the payment of the prescribed fees.

(b) Where the patent application describes or claims as an invention that relates to biological material and requires for the performance of the invention, the use of a biological

material which is not available to the public on the filing date of the application and which cannot be made or obtained on the basis of the description in the application, the biological material shall before the acceptance of the application be dealt with in the manner prescribed in the Regulations.

(2)(a) The Office shall examine whether the formal and physical requirements for applications as laid down in the Implementing Regulations and the Administrative Instructions have been complied with and, if so, shall accord the appropriate filing date to the application.

(b) If the Office finds that the application does not comply with the formal and/or physical requirements, it shall notify the applicant accordingly, inviting him to comply with the requirements within the prescribed period. If the applicant does not comply with the requirements within the said period, the Office shall refuse the application.

(c) The Office shall notify each designated State of the fact that a patent application has been filed which complies with the prescribed formal requirements.

(3) The Office shall undertake, or arrange for, the substantive examination of the patent application. If it finds that the invention claimed in the application does not comply with the requirements of patentability referred to in Sub-section (10), it shall refuse the application.

(4) Where under—

(a) sub-section (2)(b) or (3) of this Section,

(b) any other protocol within the framework of ARIPO,

the Office refuses any application, the applicant may, within the prescribed period, request the Office to reconsider the matter.

(5) If after the Office has reconsidered the application, the Office is still of the view that the application should be refused, the applicant may lodge an appeal against the decision of the Office to the Board of Appeal established in terms of Section 4*bis* of the Protocol.

(6) (a) Before expiration of six months from the date of the notification referred to in Sub-section (7), a designated State may make a written communication to the Office that, if a patent is granted by the Office, that patent shall have no effect in its territory for the reason—

(i) that the invention is not patentable in accordance with the provisions of this Protocol, or

(ii) that, because of the nature of the invention, a patent cannot be registered or granted or has no effect under the national law of that State.

(b) If the Office decides to grant a patent, it shall notify the applicant and each designated State. Where the examination was based on a search report and examination report, a copy of the same shall be attached to the said notification. The designated State shall have 6 months within which to respond to the notification.

(7) After expiration of the said 6 months, the Office shall grant the patent, which shall have effect in those designated States which have not made the communication referred to in Sub-section (6). The Office shall publish the patent granted.

(8) If the Office refuses the application notwithstanding a request for reconsideration under Sub-section (4), the applicant may, within 3 months from being notified of such refusal, request that his

application be treated, in any designated State, as an application according to the national law of that State.

(9) At any time before the grant or refusal of a patent, an applicant for a patent may, upon payment of the prescribed fees, convert the application into an application for a utility model, which shall be accorded the filing date of the initial application. An application may not be converted under this Sub-section more than once.

(10)(a) Inventions for which patents are granted by the Office shall be new, shall involve an inventive step and shall be industrially applicable.

(b) An invention shall be considered to be new if it is not anticipated by the prior art.

(c) Everything made available to the public anywhere in the world by means of a written disclosure (including drawings and other illustrations), an oral disclosure or by use or an exhibition, shall be considered prior art, provided that such publication occurred before the date of filing of the application or, if priority is claimed, before the priority date claimed in respect thereof and further provided that a disclosure of the invention at an official or officially recognized exhibition shall not be taken into consideration if it occurred not more than 6 months before the date of filing of the application or, if priority is claimed, before the priority date claimed in respect thereof.

(d) An official or officially recognized exhibition is an exhibition recognized by a State or falling within the terms of the Convention on international exhibitions.

(e) An invention shall be considered as involving an inventive step if, having regard to the prior art, it is not obvious to a person skilled in the art.

(f) An invention shall be considered as susceptible of industrial applicability if it can be made or utilized in any kind of industry including agriculture.

(g) An applicant for an ARIPO patent application shall be allowed at least one opportunity of amending the description, claims and drawings of his own volition. An ARIPO patent application or ARIPO patent may not be amended in such a way that it contains subject-matter which extends beyond the content of the initial application as filed.

(11) On each anniversary of the filing of the application, the ARIPO Office shall collect the prescribed annual maintenance fees, part of which shall be distributed among the designated States concerned. The amount of the fees shall depend on the number of States in respect of which the application or patent is maintained. Provided it is maintained, a patent granted by the Office shall in each designated State have the same effect as a patent registered, granted or otherwise having effect under the applicable national law. The duration of the patent shall be 20 years from the filing date.

(12) A patent granted by the Office shall in each designated State be subject to provisions of the applicable national law on compulsory licences, forfeiture or the use of patented inventions in the public interest.

(13) An assignment of an ARIPO patent application shall be made in writing and shall require the signature of the parties to the agreement.

(14)(a) If two or more persons have made the same invention independent of each other, the right to an ARIPO patent therefor shall belong to a person whose patent application has the earliest date of filing, provided that the first application has been published.

(b) An ARIPO patent shall confer on its proprietor from the date on which the mention of its grant is published in the ARIPO Journal, in each Contracting State in respect of which it is granted, the same rights as would be conferred by a national patent granted in that State.

(c) An ARIPO patent application shall on the date of its publication provisionally confer upon the applicant the protection provided for in Section 3(14)(b) in the contracting states designated in the application. Any contracting state may prescribe that an ARIPO patent shall not confer such protection as specified in Section 3(14)(b).

(d) An infringement of any ARIPO patent shall be dealt with by the national law of the Contracting State.

(15)(a) An ARIPO divisional application shall be filed directly with the ARIPO Office in accordance with the Administrative Instruction 28(1). It may be filed only in respect of a subject matter which does not extend beyond the scope of an earlier application as filed. In so far as this requirement is complied with, the divisional application shall be deemed to have been filed on the date of filing of the earlier application and shall enjoy the same right of priority.

(b) All Contracting States designated in the earlier application at the time of filing of an ARIPO divisional application shall be deemed to be designated in the divisional application.

(16) The extent of the protection conferred by an ARIPO patent or an ARIPO patent application shall be determined by the terms of the claims. Nevertheless, the description and drawings shall be used to interpret the claims.

(17) The Administrative Instructions shall specify the following:

- (i) the time limits which are to be observed in proceedings before the ARIPO Office but which are not fixed by this Protocol;
- (ii) the manner of computation of time limits and the conditions under which time limits may be extended;
- (iii) the minima and maxima for the time limits to be determined by the ARIPO Office.

“international preliminary examination” shall be understood in the meaning evolved under the Patent Cooperation Treaty.

(2) An international application in which a Contracting State which is also bound by the Patent Cooperation Treaty is designated for the purposes of obtaining a patent under the provisions of this Protocol shall be considered to be an application for the grant of a patent under this

Protocol. The provisions of the Patent Cooperation Treaty shall apply to such international application in addition to the provisions of this Protocol and the Regulations under this Protocol; in case of conflict, the provisions of the Patent Cooperation Treaty shall apply.

(3) The ARIPO Office may act as receiving Office under Article 2(xv) of the Patent Cooperation Treaty in relation to an international application filed by an applicant who is a resident or national of a Contracting State which is also bound by the Patent Cooperation Treaty.

If the applicant does not comply with the requirements within the said period, the Office shall refuse the application.

(c) The Office shall notify each Designated State of the fact that an application for the registration of a utility model has been filed which complies with the prescribed formal requirements.

(5) The Office shall undertake, or arrange for, the substantive examination of the application for the utility model. If it finds that the application does not comply with the requirements for registration of a utility model referred to in Sub-section (2), it shall refuse the application.

(6) Where under—

(8) Before expiration of 6 months from the date of the notification referred to in Sub-section 4(c), a designated State may make a written communication to the Office that, if a utility model is registered by the Office, that registration shall have no effect in its territory for the reason—

- (i) that the utility model is not registrable under the provisions of the Protocol, or
- (ii) that, because of the nature of the utility model, such utility model cannot be registered or has no effect under the national law of that State.

(9) If the Office refuses the application notwithstanding a request for reconsideration under Sub-section (7), the applicant may, within 3 months from being notified of such refusal, request that his application be treated, in any designated State, as an application according to the national law of that State.

(10) On each anniversary of the filing of the application, the Office shall collect the prescribed annual maintenance fees, part of which shall be distributed among designated States concerned. The amount of fees shall depend on the number of States in respect of which the application or registration is maintained. Provided that it is maintained, the registration of a utility model registered by the Office shall have a duration of 10 years from the filing date.

(11) At any time before the refusal of an application for, or the registration of, a utility model, an applicant for registration of a utility model may, upon payment of the prescribed fees, convert his application into a patent application, which shall be accorded the filing date of the initial application.

(12) A registration of a utility model registered by the Office shall in each designated State be subject to provisions of the applicable national law on compulsory licences, forfeiture or the use in the public interest of registered utility models.

***Section 4***

If the applicant does not comply with the requirements within the said period, the Office shall refuse the application.

(c) The Office shall notify each designated State of the fact that an application for the registration of an industrial design has been filed which complies with the prescribed formal requirements.

(3) Before expiration of 6 months from the date of the notification referred to in Sub-section (2)(c), each designated State may make a written communication to the Office that, if the industrial design is registered by the Office, that registration shall have no effect in its territory for the reason—

- (i) that the industrial design is not new,
- (ii) that, because of the nature of the industrial design, it cannot be registered or a registration has no effect under the national law of that State, or
- (iii) that, in the case of a textile design, it is the subject of a special register.

(4) After the expiration of the said 6 months, the Office shall effect the registration of the industrial design, which shall have effect in those designated States which have not made the communication referred to in Sub-section (3). The Office shall publish the registration.

(5) If the Office refuses the application, the applicant may, within 3 months from being notified of such refusal, request that his application be treated, in any designated State, as an application according to the national law of that State.

**Rule 6bis**  
**Patent Applications Relating to Micro-organisms**

**6bis. 1. Applications**

(1) The description of an invention in an application for a patent which requires for its performance the use of a micro-organism—

- (a) which is not available to the public at the date of filing the application; and
- (b) which cannot be described in the application in such a manner as to enable the invention to be performed by a person skilled in the art shall be regarded as disclosing the invention only if—
  - (i) not later than the date of filing of the application, a culture of the micro-organism has been deposited with an international depository institution; and
  - (ii) the name of the depository institution, the date when the culture was deposited and file number of the deposit are given in the application, and, where a new deposit is made under paragraph 6bis.4 below, the applicant or proprietor makes a new deposit in accordance with that paragraph.

(2) Where the information specified under sub-paragraph (1)(b)(ii) above is not contained in the application as filed, it shall be submitted to the ARIPO Office,

- (a) before the end of the period of 16 months after the date of filing of the application or, if priority is claimed, after the priority date.
- (b) where the Office has received a request by any person for information and inspection of the application under Rule 3 of these Regulations, before the end of one month after the Office communicates to the applicant a notification of receipt of the request, whichever period is the earliest.

(3) The submission of information specified in subparagraph (1)(b)(ii) above shall constitute the unreserved and irrevocable consent of the applicant to the depository institution with which a culture is from time to time deposited making the culture available on receipt of the certificate of the ARIPO Office authorizing the release to the person named therein as a person to whom the culture may be made available and who makes a valid request to depository institution.

(4) The application for a patent referred to in paragraph (1) above shall mention any international agreement under which the micro-organism concerned is deposited.

**6bis. 2. Availability of Culture**

(1) The deposited culture shall be available upon request to any person from the date of publication of the ARIPO patent application and to any person having the right to inspect the files under Rule 3 prior to that date. Subject to the provisions of paragraph (3) of Rule 6bis. 3 below, such availability shall be effected by the issue of a sample of the micro-organism to the person making the request (hereafter called “the requester”) and the said issue shall be made only if the requester has

undertaken vis-à-vis the applicant or the proprietor of the patent–

- (a) not to make the deposited culture or any culture derived therefrom available to any third party before the application has been refused or withdrawn or is deemed to be withdrawn or, if a patent is granted, before the expiry of the patent;
- (b) to use the deposited culture or any culture derived therefrom for experimental purposes only, until such time as the patent application is refused or withdrawn or is deemed to be withdrawn or on the publication of the grant of the patent. This provision shall not apply where the requester is using the culture under a compulsory licence.

(2) For the purposes of paragraph (1) above, a derived culture is deemed to be any culture of the micro-organism which still exhibits those characteristics of the deposited culture which are essential to the carrying out of the invention. The undertaking referred to in paragraph (1) shall not impede a deposit of a derived culture which is necessary for the purpose of patent procedure.

(3) The request provided for in paragraph (1) shall be made to the ARIPO Office on a form recognised by the ARIPO Office. The ARIPO Office shall certify on the said form that an ARIPO patent application referring to the deposit of the micro-organism has been filed and that the requester or the expert nominated by him is entitled to the issue of a sample of the micro-organism.

(4) The ARIPO Office shall transmit the request, together with the certification provided for in paragraph (3) above, to the depository institution as well as to the applicant or the proprietor of the patent.

(5) The Director General of the ARIPO Office shall publish in the Journal the list of depository institutions recognised for the purposes of this Rule.

### ***6bis. 3. Availability of Culture to Experts***

(2) The following may be nominated as an expert:

- (a) any natural person provided that the requester furnishes evidence at the time of filing the request that the nomination has the approval of the applicant;
- (b) any natural person recognised as an expert by the Director General of the ARIPO Office.

(3) The nomination shall be accompanied by an undertaking from the expert vis-à-vis the applicant similar to that specified in Rule *6bis.2(1)*. In this instance the requester will be regarded as a third party.

### ***6bis. 4. New Deposit of a Micro-organism***

(1) If a micro-organism deposited in accordance with Rule *6bis.1* ceases to be available from the institution with which it was deposited because–

- (a) the micro-organism is no longer viable, or
- (b) for any other reason the depository institution is unable to supply samples, and if the micro-organism has not been transferred to another depository institution recognised for

the purposes of Rule 6bis from which it continues to be available, an interruption in availability shall be deemed not to have occurred if a new deposit of the micro-organism originally deposited is made within a period of 3 months from the date on which the depositor was notified of the interruption by the depository institution and if a copy of the receipt of the deposit issued by the institution is forwarded to the ARIPO Office within 4 months from the date of the new deposit stating the number of the application or the ARIPO patent.

(2) In the case provided for in sub-paragraph (1)(a) above, the new deposit shall be made with the depository institution with which the original deposit was made; in the cases provided for in subparagraph (1)(b) above, it may be made with another depository institution recognised for the purposes of Rule 6bis.

(3) Where the institution with which the original deposit was made ceases to be recognised for the purposes of the application of Rule 6bis, either entirely or for the kind of micro-organisms to which the deposited micro-organism belongs, or where that institution discontinues, temporarily or definitively, the performance of its functions as regards deposited micro-organisms, and the notification referred to in paragraph (1) from the depository institution is not received within 6 months from the date of such event, the 3 months period referred to in paragraph (1) shall begin on the date on which this event is announced in the Journal of the ARIPO Office.

(4) Any new deposit shall be accompanied by a statement signed by the depositor alleging that the newly deposited micro-organism is the same as that originally deposited.
